PENNINGTON THE EXALTED.

Republican Legislature to consider.

The Republicans have a bill for

congress to penalize the ex-

altered. Why don't they pass it?

The Democrats know it is not

of intention doing so, but are

only hypocritically pretending to

hold the negro vote, and

to tell him that they were

prevented by the opposition of

rebel democrats. The negroes in

all truth need the money, and if

they were pensioned only all

the money paid out for such pur-

poses would be paid out in the

South, and the greater part of it

its way into the pockets of ex-

celerated merchants, ex-land-

owners, etc., among whom are ex-

altered, and with whom they

have their business transactions.

This is one reason why the Re-

publicans will never pass the bill.

Why don't they pass it? The

majority of both House and Sen-

ate, and of course Congress, it

any day they wanted, but if they

are sincere in introducing such a

bill, why don't they pass it? It

is a simple thing to do. They

may as well pass it now as

later, and they will save the

majority in both houses the year,

and they know it.

The conservative people realize

that all the government's revenue

is to be squandered any way, and

the poor colored folk's had as

well get their share of the rich

profits of the tariff mill, as be-

lieve that the government's revenue

is to be squandered any way, and

POLITICAL BREVITIES.

The new Silver law passed by

the Republican House the other

day after the first year of its

operation.

The French have put a duty of

60¢ a bushel on American corn.

This is a great victory for

Mr. William McKinley and his

overworked conscience.

Ex-Gov. Crittenden, of Mis-

souri, says that none of the South-

ern States will be represented at

the World's Fair, should the fed-

eral election bill become a law.

EVIDENTLY the new appoint-

ment, following the recent cen-

sus, give the West both the con-

trol of national legislation and of

the selection of Presidential can-

didates.

Does it occur to our friends

who are calling Mr. Blaine "the

traitor" that his whole free-trade

argument is for the purpose of

keeping a good 70 per cent of the

work to be done by the

Republican party?

Mr. Blaine wants to know why

we should admit Cuba sugar free

from duty, when Cuba leaves a

one duty on its coffee, and

coffee free, and yet Brazil does

not favor of that kind for us?

The Louisville Times gives up a

column of its valuable space to an

Indian man who believes that

Blaine will be the democratic can-

didate for president in 1892. It

gives the West both the con-

trol of national legislation and of

the selection of Presidential can-

didates.

This comes from the federal

with excitement over the Force Bill

and other Republican outrages.

big Democratic majority in

Kentucky, ever for Clerk of the

Court of Appeals, would show us

which side the State stands.

THERE is a whole town in South

Carolina, where the Democrats

are in the majority. By some curious

inadvertence a Democrat was ap-

pointed as clerk of the court. He

has been at work only part of one

year when he was removed, and

the Republican appointed in his

place. The latter declined the ap-

pointment and no one has been

taken in his place.

When Gov. Bob Taylor, of Ten-

nessee, gave an impulse to speak

freely, he spoke strongly and

WARREN TO DEMOCRATS.

The Republican Party must

be the champion of the

people of the United States, for

years, has shown the democrats to

have a large popular majority.

There are more democrats in the

country than Republicans, includ-

ing the vote of the negroes.

Using our peculiar electoral

system, the minority, by the cor-

rupt use of money in at least two

states, managed in the last presi-
